

How to Write a Paper by Using Questionnaires

- 1) the authors should include the questionnaire in the appendix.
- 2) The authors should include a data subsection and discuss the data and the variables being used more.
- 3) The authors should discuss the methodology used in their paper more. They should cite some papers for all the equations they are using and justify that the use of equations is correct. They should include the model equations and the figure of the model in this section.
- 4) The authors could follow Liao and Wong (2008), Liao, Shi, and Wong (2012, 2014), Moslehpour, et al. (2017, 2019), Moslehpour, Pham, et al. (2018), Moslehpour, Wong, et al. (2018), and Kien, et al. (2018) for comments (2) to (4) to use LISREL in their analysis.
- 5) the authors could also use the sign test (Dixon and Mood, 1946), the Trinomial Test (Bian, McAleer, and Wong, 2011), Multinomial-Dirichlet Model (Matsumura, Tsui, and Wong, 1990), etc. to analyze ordinal data.
- 6) The authors should include diagnostic tests for all the results to show that all the models being used are valid.
