

## Should we include testing in the paper?

---

We suggest the authors include testing in their papers.

for example, the authors may read

Wong, W. K., Chew, B. K., & Sikorski, D. (2001). Can the forecasts generated from E/P ratio and bond yield be used to beat stock markets?. *Multinational Finance Journal*, 5(1), 59-86.

Wong, W. K., Manzur, M., & Chew, B. K. (2003). How rewarding is technical analysis? Evidence from Singapore stock market. *Applied Financial Economics*, 13(7), 543-551.

for more information on the testing. If the authors of the above papers do not include testing in their papers. do you think they are still good papers?
